Back end

LAMP and MAMP
Servers and site deployment
Command line tools

Relevant work experience

Web development manager
Taylor & Francis, 2008 - present

My job is to design, build and maintain websites both for Taylor & Francis and for a number of our academic publishing partners. I'm experienced in managing web design projects, from research and planning through to design, development and deployment.

I also manage a small team of web developers and have responsibility for making sure that we take a consistent approach to project management, content strategy, version control, coding and accessibility.

Communications and Website Development Officer
Southampton City Council, 2007 - 2008

The first web related job I had, although it was more about content than design and development.

I had responsibility for editing, reviewing and restructuring all web content for the Communities, Health and Care team to make it clearer and more accessible to our users.

Education

MA in Web Design and Content Planning

University of Greenwich, 2010 - 2012
Graduated with a distinction.

MA in Literary Studies and BA in Literature

University of Wales, Aberystwyth 1998 - 2002

Extra curricular

When I'm not working I'm an occasional musician, a board game geek and an enthusiastic cook. I'm also restoring an old car (4 years and counting).
